

Faculty of Science

Course:	CSCI 3090U: Computer Graphics and Visualization
Rubric for:	Group Project

Overview

The group project is worth 20% of their final mark. This rubric is designed to help the markers determine the appropriate mark for a submission, and provide appropriate feedback.

This project can be submitted as a group of 2-4 students. No individual projects will be accepted. Students were asked to include the name of all group members in the comments field in Blackboard, along with their GitHub or BitBucket repository URL.

Rubric

When marking, use the following rubric:

Requirement	Marks
<i>Difficulty (subjective):</i>	
Number of course concepts included	3
Complexity of problems tackled	3
<i>Work Done (subjective):</i>	
Estimated scale of work involved	8
<i>Aesthetics (subjective):</i>	
Creative concept	3
Overall appearance/aesthetic	3
Total	20

If students submit the project late, there will be a 3 mark penalty for 1 day late (i.e. 30 minutes late to 24 hours late), a 6 mark penalty for 2 days late (i.e. 24-48 hours late), and a 9 mark penalty for 3 days late (48-72 hours late). Any project submitted more than 3 days late receives zero.

I will let the markers know if there are any exceptions (e.g. students who have medical notes or SAS accommodations, that give them extra time to complete the project).
